About Hawk Overseas

Hawk Overseas, our journey is rooted in the heartland of India, Gujarat, a region celebrated for its vibrant agro-culture. We specialize in exporting a diverse range of agro products, with a predominant focus on peanuts. Our proximity to the largest peanut-producing state ensures that we source the finest quality products directly from the fields.

Key Highlights

Gujarat's Bounty: Nestled in the peanut paradise of Gujarat, we take pride in showcasing the rich agricultural heritage of our region.

Peanuts Galore: Our flagship products revolve around peanuts, encompassing a variety of types and processing methods.

Quality First: We are committed to delivering excellence. Our products undergo stringent quality checks to meet international standards.

Farm-to-Table Commitment: From cultivation to processing, we meticulously oversee every stage, ensuring freshness and authenticity.

Innovative Approach: Beyond peanuts, we explore diverse agro products to provide our clients with a comprehensive selection.

Our Range Includes:

Peanuts (Java, Bold, TJ): A variety of peanuts to suit different tastes and applications.

Peanut Oil: Pure and unadulterated peanut oil to enhance your culinary experiences.

Value-Added Products: Innovatively processed peanut-based products for a modern and health-conscious consumer.

Why Choose Hawk Overseas?

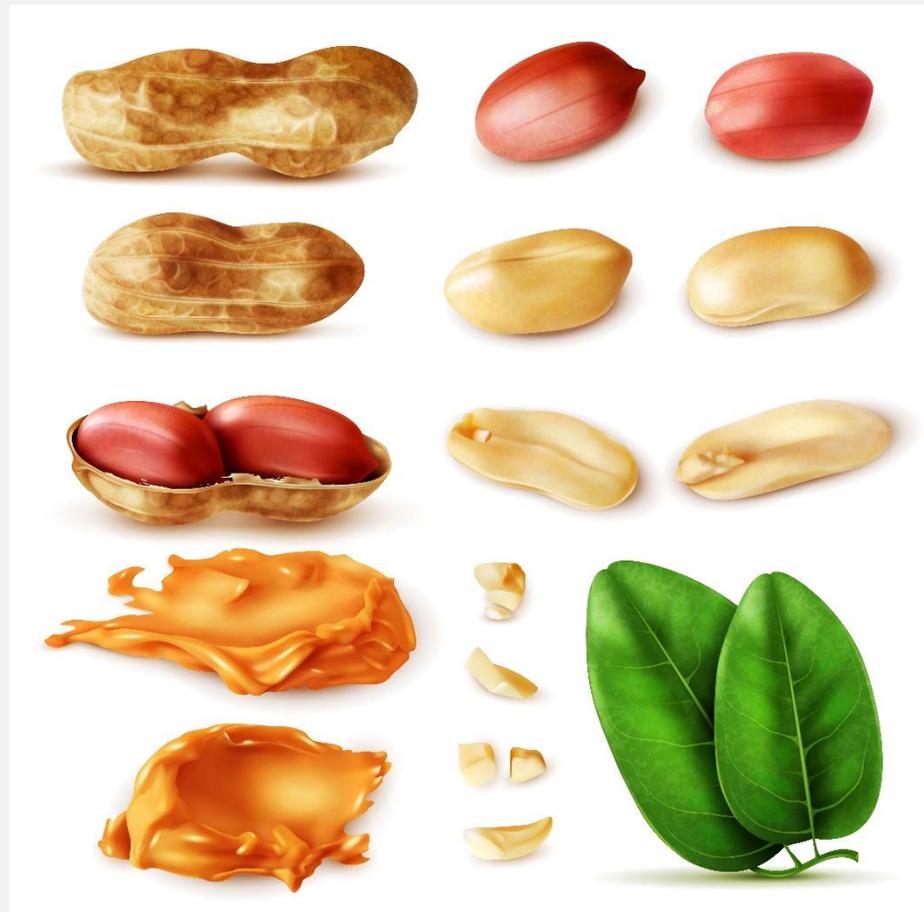

Authenticity: Embrace the genuine Flavors of Gujarat with our carefully curated products.

Reliability: Count on us for consistent quality, timely deliveries, and transparent business practices.

Global Reach: We cater to a global clientele, bringing the essence of Indian agriculture to the world.

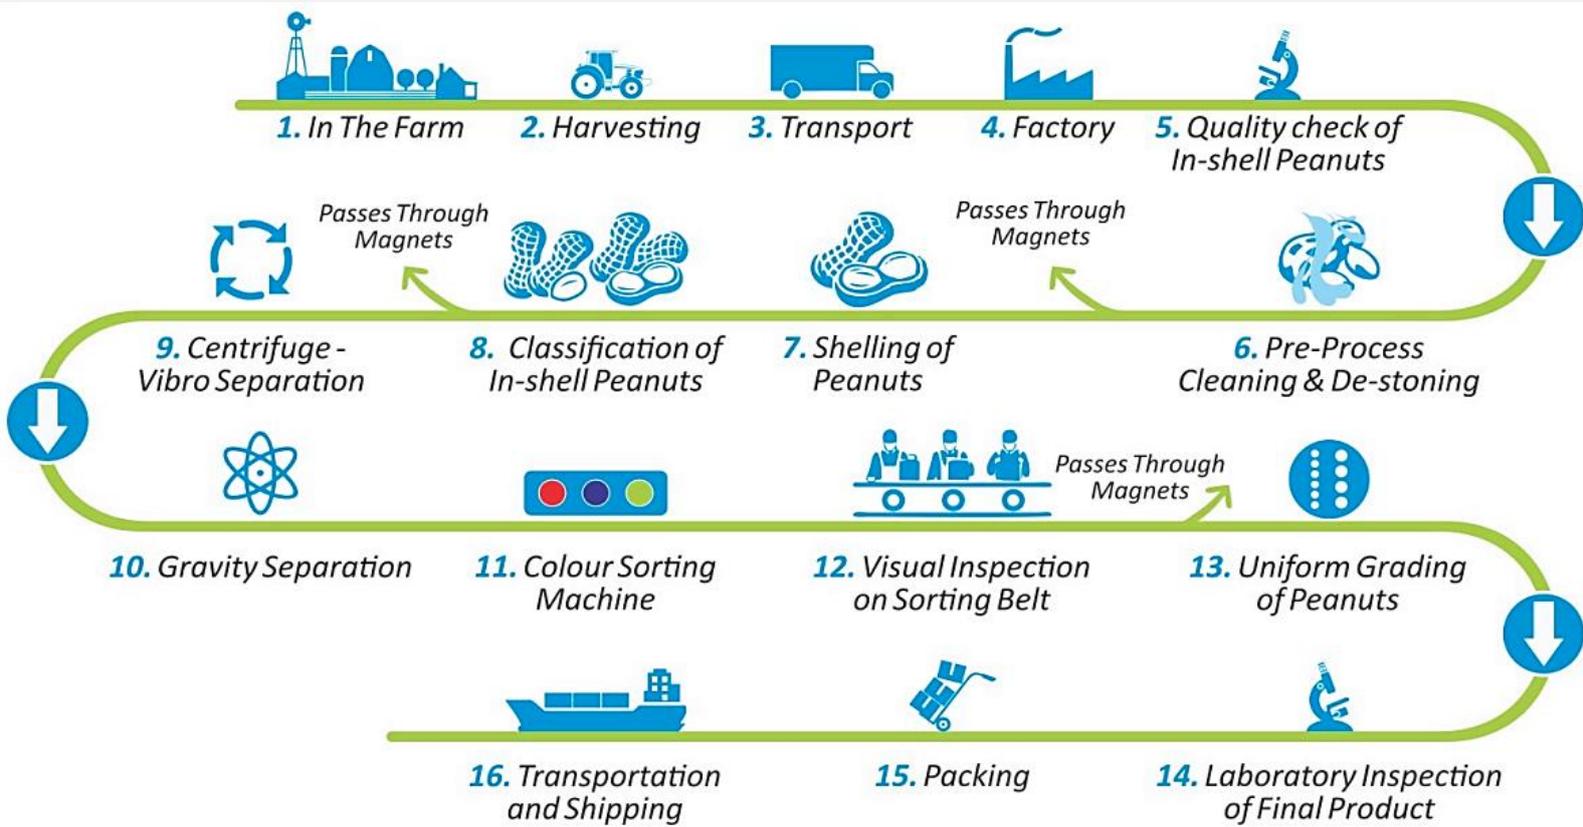

As we navigate the world of agro exports, Hawk Overseas remains dedicated to fostering enduring relationships, providing top-notch products, and contributing to the global culinary tapestry.

Discover the taste of authenticity with Hawk Overseas – your trusted partner in agro excellence.

PROCESS

Good Manufacturing Practice (GMP) is strictly implemented in our processing unit. The info-graphic below represents the different steps involved in processing peanuts at our unit

JAVA PEANUT

****Java Peanuts (Arachis Hypogea): A Nutritional Marvel****

JAVA or Spanish peanuts, scientifically known as *Arachis Hypogea*, belong to the legume family Fabaceae. Originating in South America and introduced globally by Spanish traders, Java peanuts have become a culinary sensation. Recognized for their eye-catching kernel size, these nuts boast a pink outer skin and are meticulously processed using advanced machinery.

Key Features:

Creamy Butter Taste: Java peanuts are renowned for their creamy, buttery flavor, making them a staple in various dishes.

Ideal for Peanut Butter: With a rich, creamy taste, Java peanuts are the preferred choice for crafting high-quality peanut butter.

Cultivation and Harvest: Java peanuts are grown during the summer with relatively low water requirements. Approximately 85% of peanuts sold in spring or early summer are of the Java variety.

Plant Characteristics: The Java peanut plant is a soft, bush-like herb, reaching up to 32-40 cm tall. It takes about 80 to 100 days to mature.

Processing and Packaging: After careful harvesting, the peanuts undergo post-curing, drying, and meticulous processing. Java peanuts are characterized by their smaller size and thicker outer shell.

Health Benefits:

Protein-Rich: Java peanuts are naturally free of trans fats and sodium, providing essential protein for cell repair.

Antioxidant Resveratrol: Known for preventing heart strokes and acting as an anti-aging phytochemical.

Vitamin B9 (Folate): Supports iron absorption and helps alleviate anaemia.

Polyphenolic Antioxidants: Boost digestive health.

Colon Cancer Prevention: Regular consumption of peanut butter can reduce the risk of colon cancer.

Diabetes Management: Low in carbs, making it an excellent choice for diabetic individuals.

Magnesium Content: Maintains muscle and nerve functions, strengthens the immune system.

Anti-Aging Properties: Contains vitamin C and E, delaying visible signs of aging.

Hawk Overseas Quality Assurance:

Hawk Overseas is your trusted supplier of premium Java peanuts. We offer flexibility in catering to customized orders, ensuring hygienic packaging, competitive pricing, timely delivery, and a straightforward export process.

Experience the nutritional marvel of Java peanuts with Hawk Overseas – your gateway to quality and taste.

Product	Java Peanut Seeds
HS Code	12024210
Count	50-60, 60-70, 70-80, 80-90
Packing	20/25/50 kg HDPE/PP/Vacuum/Jute Bags or Customized
Loading	18 MT (20 FT), 26 MT (40 FT)
Aroma	Creamy and Nutty
Color	Pink Skinned
Self-Life	1 Year in cool and Dry Place
Origin	India

BOLD PEANUT

****The Bold Peanuts: Nutritional Marvels with a Rich History****

Peanuts, also known as groundnuts, are globally cherished for their nutty flavor and versatile applications. Scientifically named *Arachis hypogaea*, they belong to the legume family Fabaceae. Originating from South America, Spanish traders introduced peanuts to the world as a cocoa substitute in the early days.

Distinctive Features:

Flavor Profile: Sweetish, creamy, and delicately nutty, offering a rich source of protein.

Processing Evolution: Initially cumbersome to extract, advanced machines now simplify peanut extraction.

Nutritional Benefits:

Vitamin B3 (Niacin): Enhances brain function and memory.

Resveratrol: Supports proper blood flow to the brain.

Oil Content: Bold peanuts boast over 25% oil content, making them a significant oilseed in India.

Cultivation and Harvest:

Variety: Bold peanuts, also known as Runner peanuts, thrive in well-irrigated regions.

Seasonal Cycle: Primarily a winter crop, with 75% produced during the kharif season and 25% during rabi season.

Harvest Process: Plants mature in 90-110 days, and after careful harvesting, curing takes place for 7-10 days.

Commercial Significance:

Oilseed Leader: Bold peanuts constitute around 25% of India's oilseed production.

Global Demand: High demand in China, Vietnam, Europe, the Middle East, Canada, Russia, and North America.

Health Benefits:

- 1. Protein Source:** Naturally free of trans-fats and sodium, offering essential proteins for cell repair.
- 2. Brain Health:** Rich in Vitamin B3 and niacin, enhancing brain function and memory.
- 3. Heart Protection:** Resveratrol helps prevent heart strokes by promoting nitric oxide production.
- 4. Anaemia Relief:** Vitamin B9 and folic acid aid iron absorption, providing relief from anaemia.
- 5. Metabolic Boost:** Manganese supports calcium absorption, carbohydrate metabolism, and blood sugar regulation.
- 6. Digestive Health:** Polyphenolic antioxidants improve digestive health, and coumaric acid controls carcinogenic nitrous amine production.

Hawk Overseas Commitment:

Hawk Overseas ensures the supply of premium-quality peanuts, hygienically packaged, at competitive prices, meeting bulk requirements promptly. Our peanuts contribute to the global palate, offering both culinary delight and health benefits.

Product	Bold Peanut Seeds
HS Code	12024210
Count	40-50, 50-60, 60-70
Packing	20/25/50 kg HDPE/PP/Vacuum/Jute Bags or Customized
Loading	18 MT (20 FT), 26 MT (40 FT)
Aroma	Creamy and Nutty
Color	Red Skinned
Self-Life	1 Year in cool and Dry Place
Origin	India

BLANCHED PEANUT

****Blanched Peanuts: A Nutritional Marvel****

The scientific nomenclature for peanuts is *Arachis hypogaea*, a legume belonging to the Fabaceae family. Renowned for their rich nutrient profile, peanuts are encased in a shell, with a pink or red skin surrounding the nutmeat. Blanching, the process of removing this outer skin, yields creamy, blanched peanuts. Hawk Overseas, a leading exporter, specializes in delivering premium quality blanched peanuts.

Processing Excellence:

Blanching involves immersing peanuts in boiling water for 2-3 minutes, rapidly cooling them, and meticulously rubbing off the skin. This meticulous process results in blanched peanuts with a special sweetish creaminess, distinct nutty flavor, and rich protein content.

Customized Orders:

Hawk Overseas caters to global demand, supplying blanched peanuts across China, Vietnam, Europe, the Middle East, Canada, Russia, and North America. Clients can place customized orders for Java/Spanish peanuts or Bold/Runner peanuts.

Health Benefits:

Brain Functionality: Niacin (Vitamin B3) enhances brain function and memory, while resveratrol aids blood flow to the brain.

Heart Health: Resveratrol acts as an antioxidant, preventing strokes and offering anti-aging benefits.

Vitamin B Family: Biotin supports energy conversion and maintains hair, nails, and skin health.

Folate Content: Vitamin B9 aids iron absorption and alleviates anaemia.

Cancer Prevention: Peanut butter consumption reduces colon cancer risks.

Diabetic-Friendly: Low in carbs, peanuts are an excellent dietary choice for diabetic individuals.

Skin Health: Monounsaturated fats and vitamins promote clear, glowing skin, with vitamins C and E delaying aging signs.

Why Choose Hawk Overseas?

- Premium Quality
- Hygienic Packaging
- Competitive Prices
- Timely Delivery
- Hassle-Free Export Process

For a nutritious and delightful peanut experience, choose Hawk Overseas – your trusted partner in agro excellence.

Product	Blanched Peanut Seeds
HS Code	12024210
Count	38-42, 40-50, 50-60, 60-70, 80-90
Packing	20/25/50 kg HDPE/PP/Vacuum/Jute Bags or Customized
Loading	18 MT (20 FT), 26 MT (40 FT)
Aroma	Creamy and Nutty
Color	Red Skinned
Self-Life	1 Year in cool and Dry Place
Origin	India

Quality Check	The peanuts bought from the farms undergo a strict quality check and are unloaded only after approval from quality control department.
Pre-Process Cleaning and De-stoning	The in-shell peanuts are separated from dust, mud, heavy stones, stalks, leaves, undeveloped pods and small in-shells by a classifier separator and in a de-stoning machine.
Shelling	The peanut kernels (red seeds) are removed and separated from the outer thick yellow shells.
Classification of in-shells and kernels	At this stage impurities such as in-shell peanuts, damaged and very small kernels are removed.
Centrifuge-Vibrio Separation	This process involves separating lighter materials such as husk, shells, small kernels, etc. from heavier peanut kernels by subjecting the mixture through centrifugal and vibrating motion.
Gravity Separation	This machine uses the principle of gravity by lifting the mixture in air and then separating heavy as well as light impurities e.g., removing impure matter such as shrivelled kernels, ergot, light kernels, pods, stones etc.
Colour Sorting	The peanuts then pass through the process of optical inspection by which contaminants such as Discolored peanuts, dark peanuts and foreign materials are removed from final product. We use Sortex machine for this process: It is a combination of the most advanced high-resolution cameras that identifies the widest range of foreign material, extraneous matter, smaller spot defects, finer product damage by subtle colour difference.
Uniform Grading	Grading is the process of separating out broken kernels and grading the nuts in uniform size by diameter and thickness
Packing	Peanuts are packed according to the buyer's specification. Vacuum bags, Jute bags, food grade HDPP bags, woven PP bags and jumbo tote bags can be used to pack the finished products

Technical Specifications

HS Code	102024210
Packing	20/25/50 kg HDPE/PP/Vacuum/Jute Bags or Customized
Loading	18 MTs (20 FT), 26 MTs (40 FT)
